

PROJECT SPIRAL

PROJECT OVERVIEW

Description

Project Spiral is a web based project management application that allows users to manage their projects by adding, arranging, and deleting projects.

Goal

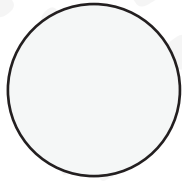

The overall goal of Project Spiral is to provide a reliable and secure way for people to manage their various projects. A future goal is to add the feature to sync projects to all major calendar applications.

Target Audience

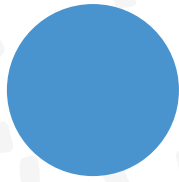

Project Spiral is targeted towards a wide audience - from students seeking a way to manage class projects to business people needing a way to prioritize theirs.
